General Rate Case Update (Docket No. RP18-1126)

On August 31, 2018, Transco filed a general rate case with the Federal Energy Regulatory Commission (“Commission”) for an overall increase in rates and to comply with the terms of the settlement in the prior rate case to file a rate case no later than August 31, 2018. On September 28, 2018, the Commission issued an order accepting and suspending our general rate filing to be effective March 1, 2019, subject to refund and the outcome of a hearing, except that rates for certain services that were proposed as overall rate decreases were accepted, without suspension, to be effective October 1, 2018. The decreased rates will not be subject to refund but may be subject to decrease prospectively under Section 5 of the Natural Gas Act of 1938, as amended. On March 18, 2019, the Commission accepted Transco’s motion to place the rates that were suspended by the September 28, 2018 order into effect on March 1, 2019, subject to refund. Transco and the rate case participants have held seven formal settlement conferences. At the conclusion of the October 10, 2019, settlement conference, the participants reported that they had reached a settlement in principle. Dates were established through mutual agreement for documenting the settlement and filing it with the Commission.

Commission Approves Momentum Expansion Project Zone 5 to Zone 5 Rate (RP20-211-000)

On November 22, 2019, the Commission approved Transco’s filing to revise the Momentum Expansion Project tariff record to include a Zone 5 to Zone 5 reservation recourse rate effective December 7, 2019.

Commission Approves Gateway Expansion Project Request for In-Service and Initial Rate (CP18-18-000 and RP20-163-000)

On November 22, 2019, the Commission approved Transco’s filed Request for Authorization to Place Facilities into Service and Commence Full Service for its Gateway Expansion Project (“Project”) effective December 1, 2019. Further, the Commission approved the initial rate for the Project effective with the in-service date of the Project, which is anticipated to be placed in service mid-December 2019.
