1/ The fuel retention percentages apply only to the forward-haul portion, if any, of a transportation. For transactions in which the receipt zone is downstream of the delivery zone, the within zone fuel retention percentage(s) will apply for each zone(s) in which there is a forward haul movement of gas. No fuel will be retained on transportation which does not include a forward-haul movement of gas.

2/ Transportation deliveries to Zone 4B do not entail the forward-haul movement of gas in Zone 4B.

3/ The Zone 4 fuel retention percentages, which percentage applies to quantities transported from the Station 84 Zone 4 Pool, is included in the fuel retention percentages shown.

4/ The stated fuel retention percentages for deliveries to Zones 1, 2, or 3 assume no forward-haul movement of gas in zones 1, 2 or 3.

5/ The Zone 4A fuel retention percentage, which percentage applies to quantities transported from the Station 85 Zone 4A Pool, is included in the fuel retention percentages shown.
