Operation Flow Order Discussion

Changes to tariff GT&C Section 51 and 52

Tariff Changes

- Eliminate Section 51 (Operational Controls) and incorporate cumulative imbalance restrictions into Operational Flow Order Section 52.
- Two new OFO types will be:
 - Reduce Cumulative imbalance OFOs which require a party's cumulative monthly imbalance to be made up over a specified time period; (minimum of three (3) Gas Days, one of which must be a business day), to no greater than the tolerance percentage defined in the OFO.
 - Maintain Cumulative imbalance OFOs which require parties' cumulative imbalances to maintain for the duration of the OFO within a designated threshold.
- Add New OFO classes that allow for tiered or non-tiered penalties for all types of OFOs :
 - Class 1 OFO: no less than 2% or 10,000 tolerance and penalty tiering
 - Class 2 OFO Imbalance: no less than 5% or 5,000 tolerance and no penalty tiering
 - Class 2 OFO Scheduling: no less than 5% or 1,000 tolerance and no penalty tiering

Customer Forum – Proposals OFO Changes

Tariff Changes

- Penalties will also be dependent on the OFO Class called:
- Class 1 OFO will allow for penalty tiering:
 - Penalty Tier 1 \$5.00 for quantities that are up to 1.5% above tolerance.
 - Penalty Tier 2 –\$10.00 for quantities that are greater than 1.5% above tolerance but less than 3% above the tolerance.
 - Penalty Tier 3 \$15.00 for quantities greater than 3% above tolerance.
- Class 2 OFO will not allow for penalty tiering :
 - All quantities above tolerance will be subject to the higher of \$50 or 3x applicable midpoint price (current penalties).
- Class 1 or 2 will be declared in the OFO notice
 - If Class 1 is not sufficient to address the situation fully, then a Class 2 will be called
- Adding the same indices as the Cashout filing for Class 2

Example of new OFO tiering

Daily OFO Imbalance Due From Zone 6

| | | Exclusions | | Percent | Qty | Qty | | (Imb – Tolerance) | |
|---------|--------|--|----|--|--|-----------------------------------|-----------------|----------------------------------|---|
| | | 451,887 | | 12% | 55,000 | 10,000 | | 45,000 | |

| | | | | | | 52,406 | \$50.00 | \$2,620,300.0 | 0 |

Example of Reduce Cumulative OFO

Reduce Cumulative Imbalance OFO shall require Buyers to reduce the cumulative monthly imbalance attributable to the Buyer, over the time specified in the OFO (minimum of three (3) Gas Days, one of which must be a business day), to no greater than the tolerance percentage defined in the OFO. Any cumulative monthly imbalance attributable to a party to which Seller has directed a Reduce Cumulative Imbalance OFO in excess of the allowable variation specified by Seller in the OFO shall constitute an unauthorized OFO Imbalance. The allowable variation specified by Seller in the OFO shall not be less than 2% or 10,000 dt, whichever is greater (Class 1 OFO) or not less than 5% or 5,000 dt, whichever is greater (Class 2 OFO), in each area in which the OFO is in effect.

| Example 2 | L Reduce (| Cumulative O | FO Called o | on Day 15 | 10% Due From to be Effective D | | | | |
|-----------|------------|---------------|-------------|------------|---------------------------------------|---------|-------------|------------|--|
| | | | Cumulative | | | | | | |
| | | | Imbalance | Deliveries | Tolerance | Penalty | | | |
| Thursday | OFO Day 1 | Gas days 1-15 | 15,000 | 120,000 | 12,000 | 3,000 | 3 day grace | No penalty | |
| Friday | OFO Day 2 | Gas days 1-16 | 32,000 | 240,000 | 24,000 | 8,000 | 3 day grace | No penalty | |
| Saturday | OFO Day 3 | Gas days 1-17 | 34,000 | 365,000 | 36,500 | 0 | 3 day grace | No penalty | |
| Sunday | OFO Day 4 | Gas days 1-18 | 26,100 | 490,000 | 49,000 | 0 | | No penalty | |
| Monday | OFO Day 5 | Gas days 1-19 | 27,100 | 615,000 | 61,500 | 0 | | No penalty | |

Example 2 of Reduce Cumulative OFO

Class 1 Reduce Cumulative OFO Called on Day 15

10% Due From to be Effective Day 18

| | | | Cumulative | | | | | |
|--------------|-----------|---------------|------------------|-------------------|------------------|---------|-------------|-------------|
| | | | Imbalance | Deliveries | Tolerance | Penalty | | |
| Thursday | OFO Day 1 | Gas days 1-15 | 15,000 | 120,000 | 12,000 | 3,000 | 3 day grace | No penalty |
| Friday | OFO Day 2 | Gas days 1-16 | 28,000 | 240,000 | 24,000 | 4,000 | 3 day grace | No penalty |
| Saturday | OFO Day 3 | Gas days 1-17 | 32,000 | 280,000 | 28,000 | 4,000 | 3 day grace | No penalty |

| | | | 14,700 | | | | 13,000 | \$93,250.00 |

Example of Maintain Cumulative OFO

Maintain Cumulative Imbalance OFO

The OFO shall require Buyers to maintain for the duration of the OFO the cumulative monthly imbalance attributable to Buyer at the time of the OFO notice. Any change in such cumulative imbalance attributable to a Buyer in excess of the allowable variation specified by Seller in the OFO shall constitute an unauthorized OFO Imbalance. The allowable variation specified by Seller in the OFO shall not be less than 2% or 10,000 dt, whichever is greater (Class 1 OFO) or not less than 5% or 5,000 dt, whichever is greater (Class 2 OFO), in each area in which the OFO is in effect.

| Shipper A: Ir | nbalance tolerance | e used is 10,00 | 00 dts | | | | | | | | |

Daily Overrun and Underrun Discussion

Changes to tariff GT&C Section 18

Unauthorized Daily Overrun

- Changes to the Allowable Daily Dispatching Variations. This is the quantity of unauthorized overrun that is subject to Tier 1 penalty. Currently, the Allowable Daily Dispatching Variation is a seasonal percentage of the sum of:
 - (1) allocated primary FT (including high burns) at the location;
 - (2) scheduled secondary FT at the location; and
 - (3) scheduled IT at the location.
- (1) above is proposed to be split between:
 - Allocated Traditional FT (including high burns) at the location; and
 - Scheduled Non-Traditional FT at the location.
- This does not change the quantity of Unauthorized Daily Overrun; only how it is tiered.
- Tier 1 penalty will be charged the zone of delivery instead of Zone 3 to Zone of delivery. This is consistent with changes made in the Priority of Service filing.

Unauthorized Daily Overrun Example – 5% Tolerance

| | | | Allowable Daily Dispatching Variation Current | | | | |

* Pending approval of Cash-out Price Calculation filing (RP20-614)

Price "Sell"*

Changes to Tariff GT&C Section 18

Unauthorized Daily Underrun

- Unauthorized Daily Underrun is a daily penalty for Swing Service Delivery point operators that flow less than scheduled quantities at their location(s).
- Unauthorized Daily Underruns DO NOT include low-burn transactions scheduled on: FT Traditional deliveries, bundled storage transactions, and "linked" swing supplier transactions
- Unauthorized Daily Underrun will always be applicable with an allowable variation (tolerance) percentage posted on the 1Line Informational Postings page. The allowable variation will be calculated by applying the posted percentage to the total scheduled at the location excluding FT Traditional deliveries, bundled storage transactions, and "linked" swing supplier transactions.
- Penalties will be tiered 1 3:
 - Tier 1 IT rate for the applicable zone of delivery for quantities exceeding the allowable variation up to double that variation. If the allowable variation is 10% then quantities exceeding the 10% but less than or equal to 20% will be in Tier 1.
 - Tier 2 \$2.50 for quantities in excess of Tier 1 and up to 50 dt
 - Tier 3 Higher of \$50 per dt or 3 times the Reference Spot Price "Buy"* for remainder of quantities in penalty
