Northeast Supply Enhancement Project – Docket No. CP17-101-000 and CP20-49-000 et al.

On May 29, 2025, Transco submitted its Petition for Expedited Reissuance of Certificate Authority authorizing Transco to construct and operate the Northeast Supply Enhancement Project (Project) under Docket No. CP17-101-000, CP20-49-000 et. al. The Project’s Certificate Order issued on May 3, 2019 found strong market demand for the Project and, based on the benefits the Project would provide and the minimal adverse impacts on landowners and surrounding communities, held the “public convenience and necessity requires approval of this [P]roject.” The denial of Section 401 applications by New York and New Jersey prevented Transco from constructing the Project; however, Transco is still committed to the Project. Therefore, Transco requests expedited action on this request by August 29, 2025, so that it can start construction on the Project by the end of the year.
